testostor 171-4 with up to 4 external temperature probe connections is used for simultaneous temperature measurement at different locations e.g. in production processes or in storage areas.

You can place the testostor 171-1 data logger beside the goods and attach the separate probe to doors or refrigeration appliances up to 12 m away. Air moisture can also be checked, if required.

Logs temperatures e.g. in refrigeration units. testostor 171-1 data logger with display attached, shows fluctuations in temperature.

NEW ● On-site application:
Testo software for Palm OS® replaces laptop/PC

● Tamperproof measured results

● Clear printout on location on the Testo printer
