

VWR Collection water baths

Great quality
Great performance
Great prices

VWR Collection VWB water baths are constructed with a double wall of stainless steel and coated steel sheet housing. An electronic PID-controller with digital temperature setting guarantees high temperature stability. A timer alarm can be set so that the water bath will maintain the required temperature after the alarm has sounded. The baths are protected against 'running dry' as the heater automatically switches off if liquid is low.

Note: Baths are classified to Safety Class 1 allowing unattended operation in combination with non-flammable liquids.

- Digital temperature indicator with 3 customisable fixed temperatures
- Digital timer
- Balancing distribution of temperature by flat radiator
- Transparent polycarbonate lid with hinge
- Drain cock and removable shelf as standard
- Residual heat display on standby
- Power and heating indicator lamps in the display
- Dry-running protection

Technical specifications:

- Operating temperature range (°C): Ambient +5 to 100
- Temperature stability (K): ±0,2
- Temperature display: Digital (0,1)
- Temperature setting: Digital (0,1)
- Allowed ambient temperature (°C): 1 to 50
- Power supply: 230 V, 50/60 Hz
