When used with item number given in the overview (beginning with "RA1..."), grid dividers are always supplied separately (standard supply).

Instead of the customary method of supplying the box and grid divider separately, the box can be supplied with the grid divider already inserted (no surcharge!). For this purpose the code in the item number for the grid divider (highlighted in yellow) must be added to the item number of the box.

Example: ALPHA Box of height 50 mm, white, standard as well as inserted grid divider of height 30 mm with 10x10 cells.

Nothing is impossible!

Well-organized freezers and refrigerators are an essential prerequisite for systematic, efficient and ultimately successful work – not only in scientific laboratories.

We provide the means to fulfil this prerequisite and devote ourselves to the task from a sense of conviction and with passion.

In fact, it is a passion for practical details and our liking for intelligent solutions.

This catalogue contains many suggestions for the interior fittings of all brands of refrigerator and freezer cabinets as well as freezer chests.

If you are looking for a solution to a problem or need assistance in setting up your refrigeration equipment, please contact us.

We will always be able to offer you a solution and will be glad to help you.
